3.6. Pages 37 to 39 – section 4.5.1 Principal Activities

The section under the heading **“4.5.1 Principal Activities”** shall be amended and shall read as follows:

“The primary business activity of the Issuer includes the provision, installation, financing and operation of photovoltaic systems (photovoltaics) through contracting models.

Photovoltaics is a technology used to convert sunlight (solar radiation) into electricity. Solar cells are either connected in series or in parallel to convert solar light into voltage. The solar cells to be used in such cases usually consist of silicon crystals.

In providing services related to “Photovoltaic Contracting” (as defined below), either Sun Contracting AG or any of the Group Companies (“Contracting Entity”) enters into a contract with a client according to which the Contracting Entity shall install, operate and maintain a photovoltaic system. The scope of the business model of, and the strategy behind, “Photovoltaic Contracting”, which has been devised in connection with the installation and running of photovoltaic arrays (hereinafter referred to as “Photovoltaic Contracting”) is based on (i) the delivery of a complete photovoltaic array, (ii) as well as the installation and assembly of the complete photovoltaic array by or on behalf of the Contracting Entity including necessary materials and ancillary materials and related safety devices (surge arrester, equipotential bonding, etc...) and (iii) the operation and maintenance of a photovoltaic array. In order for the Contracting Entity to install a photovoltaic system, a client shall agree to provide space for the installation of such photovoltaic system either on the roof of a building or on any other surface area during the term of an agreement with regard to Photovoltaic Contracting. In individual cases, a Contracting Entity may also decide to purchase a surface area with the purpose to install a photovoltaic system. The photovoltaic system to be installed by a Contracting Entity shall be adjusted and customized to the available surface area in the most efficient way.

Within the scope of Photovoltaic Contracting “usage and purchase agreements” (hereinafter, “Agreements”) are being concluded between the Contracting Entity and its clients. Pursuant to such an Agreement a client of a Contracting Entity shall be entitled to be provided by the operator of the photovoltaic system, which is the Contracting Entity, with the electricity which is generated by a photovoltaic array at a remuneration to be agreed upon by the client and the Contracting Entity in advance. At the same time a client, who is the counterparty of an Agreement, shall be obligated pursuant to such an Agreement to provide space on the roof of a building or on any other surface area to be used for a photovoltaic array, which is to be installed by or on behalf of the Contracting Entity.

In consideration of the installation, operation and maintenance of the photovoltaic array and the supply of electricity to the client, the Contracting Entity shall be entitled to a remuneration which is depending on the

electricity to be generated by the respective complete photovoltaic system and to be supplied to a client. Such remuneration shall be payable by the client to the Contracting Entity in monthly instalments, whereas an Agreement usually stipulates that over its entire term a fixed amount in EURO per kWh of generated electricity shall be charged to the client.

In the period of the initial twelve months of the term of an Agreement, the amount of the monthly instalment of the remuneration to be paid by a client will be estimated and calculated on the basis of the installed module capacity of a photovoltaic system and on prevailing weather conditions (the minimum number of hours of sunshine) to be expected or presumed for the region in which the photovoltaic array is to be installed. Accordingly, the amount of monthly instalments is to be determined individually for each client and for each project, respectively.

At the end of the initial twelve months, the remuneration which is based on an estimated output of a photovoltaic system is reconciled with the measured real electricity output of a photovoltaic system, whereas the difference between the estimated consumption and the real consumption of a client, hence any overpayment or underpayment, is to be settled between the Contracting Entity and the client. Such reconciliations and adjustments are being made annually and are based on the records of the actual annual yield of the photovoltaic system. Accordingly, the revenues of the Contracting Entity are calculated on the basis of the electricity actually having been produced and supplied whereas the monthly instalments to be paid by a client are adjusted on a yearly basis to the output of a photovoltaic system in the respective previous year.

Agreements are usually being entered into for a term of 20 years. After expiry of the term of an Agreement, the ownership of a photovoltaic system will usually be transferred to the respective client, who is the counterpart of the Contracting Entity under an Agreement. Hence, after having settled the last monthly instalment under an Agreement, a contracting client may become the owner of the entire photovoltaic system. During the term of the Agreement, the Contracting Entity as operator of the photovoltaic system, shall be solely responsible for the operation, maintenance and service of the photovoltaic system.

Thus, the business model of Sun Contracting AG and the Group Companies is essentially being based on the production and sale of carbon free electricity and solar energy, respectively.

The upside for clients is that the price for the procurement of energy to be agreed upon with a Contracting Entity essentially corresponds to the price which the respective client would have to pay to an energy provider at the time the Agreement is concluded. However, the Agreements are usually stipulating that there will be no increases of the remuneration during the term of the Agreement, which provides the clients with greater predictability regarding its energy expenses. In individual cases, the level of remunerations to be paid by clients will be fixed to, and adapted in accordance with, a price index. In addition, the ownership of the photovoltaic system will usually be transferred to the client without any additional payments to be made by a client after the end of the term of an Agreement of usually 20 years.

The services to be provided by a Contracting Entity as described above basically outlines the business model of Sun Contracting AG and the Group Companies in Austria. The Sun Contracting Group offers (and intends to offer) its services in several markets (in other jurisdictions within the European Union) as well, whereby the corresponding business model may depend on, and may be adjusted to, varying legal and regulatory conditions, prerequisites and constraints in the respective markets. Hence, the business model, which the Sun Contracting Group will run and offer outside of Austria may differ from the business model it is currently conducting in Austria as far as the electricity to be generated by the photovoltaic system is not necessarily supplied to the (legal) person providing the (roof) space where a photovoltaic system is to be installed.

The business model, which the Sun Contracting Group is running in Germany currently differs from the business model being rendered by it in Austria as far as the electricity to be generated by a photovoltaic system, which is to be installed on the roof of a building of, or on any other surface area to be provided by, a client is not necessarily supplied to that client but may also be (partly or completely) fed into the grid instead, whereby the Contracting Entity will correspondingly be entitled to a remuneration from the grid operator. Nevertheless, the business model, which Sun Contracting Group has devised for Germany does include the option to provide the electricity which is generated from a photovoltaic system to the client, who has provided the space for a photovoltaic system pursuant to an electricity supply contract.

A Contracting Entity enters into a corresponding agreement (“Use Agreements”) with a client whose roof space or other surface area is to be used by the Contracting Entity for the installation of a photovoltaic system. Pursuant to such Use Agreement the Contracting Entity undertakes to pay to the client (and owner of the corresponding roof/building/surface area) a fee (payable as one-off payment or in instalments). On the basis of a Use Agreement and subject to technical feasibility (eg roof suitability with regard to – inter alia – size, the question of whether a roof is solid enough to support the weight of a photovoltaic system and the orientation and angle of a roof) the Contracting Entity is entitled to install and run a photovoltaic system (including all components, facilities and ancillary systems) on the roof space or other surface area of a client (the counterparty). The installation and maintenance of a photovoltaic system includes all ancillary measures that are necessary and useful (such as assembly, maintenance and repair work, EEG-compatible grid connection, remote monitoring, security, etc.) to ensure the operation of the photovoltaic system.

Pursuant to the Use Agreements to be entered into with clients, a client authorises the Contracting Entity to take all actions (to make and to receive declarations), which are necessary to obtain any administrative approvals or licences from any authority with regard to the installation and operation of a photovoltaic system. The photovoltaic system shall remain the property of the Contracting Entity during the term of the Use Agreement.

In order to secure the rights of use of the Contracting Entity under a Use Agreement in connection with the installation, operation and use of a photovoltaic system, a client and owner of the roof space or other surface area to be used for a photovoltaic array shall undertake to have limited personal easements and reservations entered in the land register in favour of the Contracting Entity. The client shall also refrain from doing anything that could disrupt or impair the operation of the photovoltaic system. In particular, the client shall refrain from installing any obstacles or buildings or to plant any trees or bushes that could cast a shadow or wind on the photovoltaic systems.

At the end of a term of a Use Agreement (to be agreed upon on a case-by-case basis), it may be agreed with a client that the photovoltaic system will either be dismantled or sold to the client who (in the later case) would accordingly become owner of the photovoltaic system. Alternatively, it may be agreed with a client that the term of the Use Agreement will be extended. In such case, the client would be entitled to receive a corresponding fee from the Contracting Entity for the use of a roof space of a building or of any other surface area of a client. On the other hand, the Contracting Entity would receive a remuneration from the grid operator for feeding the electricity which is generated by the photovoltaic system into the grid.

As of the date of this Prospectus, the Sun Contracting Group has entered into several agreements with respect to its business model regarding Photovoltaic Contracting as described herein and has implemented several Photovoltaic Contracting projects. In the second quarter of 2021, Sun Contracting Group is operating 313 photovoltaic systems in Germany, Austria, the Principality of Liechtenstein and Slovenia. The total output of these 313 photovoltaic system amounts to 68.7 MWp.”

"Financial statements as of 31 December 2020

The Issuer's annual financial statements as of 31 December 2020 have been audited by Grant Thornton AG for the purpose of auditing annual financial statements in accordance with the standards of the Liechtenstein Association of Auditors, and the following statement is made in the accompanying report on the annual financial statements:

"Report of the auditors on the financial statements 2020

to the general meeting of

Sun Contracting AG, 9496 Balzers

As statutory auditors, we have audited the financial statements (balance sheet, income statement and notes) of Sun Contracting AG for the year ended December 31, 2020.

These financial statements are the responsibility of the board of directors. Our responsibility is to express an opinion on these financial statements based on our audit. We confirm that we meet the legal requirements concerning professional qualification and independence.

Our audit was conducted in accordance with auditing standards promulgated by the Liechtenstein profession, which require that an audit be planned and performed to obtain reasonable assurance about whether the financial statements and the annual report are free from material misstatement. We have examined on a test basis evidence supporting the amounts and disclosures in the financial statements. We have also assessed the accounting principles used, significant estimates made and the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements give a true and fair view of the financial position, the financial performance and the results of operations in accordance with the Liechtenstein law and the company's articles of incorporation, subject to the following qualification:

The balance sheet of Sun Contracting AG includes financial assets amounting to EUR 41'266'354.62. The recoverability of financial assets in the amount of EUR 6'764'000 cannot be assessed.

Taking into account the above qualification, we recommend that the financial statements submitted to you be approved.

Should, due to the abovementioned qualification, a value adjustment be necessary which would lead to a capital loss or to over-indebtedness, we expressly refer to Arts. 182e and 182f of the "PGR" (Liechtenstein Persons and Companies Act).

We point out that the financial statements have not been submitted to the general meeting for approval within six months following the ending of the financial year.

Schaan, September 17, 2021

Grant Thornton AG"

Hence, the auditor was unable to assess the recoverability of financial assets in the amount of EUR 6,764,000.00. Further, the Auditor has noted that the annual financial statements were not submitted to the general meeting for approval within six months of the end of the financial year.

As a consequence, the auditor has only issued a qualified audit opinion with regard to the financial year that ended on 31 December 2020. Otherwise, there were no further events in the business of the Issuer, which are highly relevant to the assessment of its solvency."

3.15. Page 57 – section 4.11.6 *Significant change in the issuer's financial position*

A description of any significant change in the financial position of the group which has occurred since the end of the last financial period for which either audited financial information or interim financial information have been published, or provide an appropriate negative statement.

"The balance sheet of Sun Contracting AG includes financial assets amounting to EUR 41'266'354.62. The recoverability of financial assets in the amount of EUR 6'764'000 cannot be assessed."

Further, the Auditor noted:

“We point out that the financial statements have not been submitted to the general meeting for approval within six months following the ending of the financial year.”

As a consequence, the Auditor has only issued a qualified audit opinion with regard to the financial year that ended on 31 December 2020. Reference is made to sections 4.4.6, 4.4.8 and 4.4.9 with respect to further issues of loans and bonds of the Issuer.”

Due to the fact that the Bonds are denominated in CHF, the following paragraph shall be added at the end of the risk factor ***“Risiko der Anleihegläubiger im Zusammenhang mit deren Stellung als Gläubiger der Emittentin.”***

„Die Schuldverschreibungen sind in CHF (Schweizer Franken) denominiert und die Zahlungen aus oder im Zusammenhang mit den Schuldverschreibungen, inklusive Zinsen, erfolgen in CHF (Schweizer Franken). Demgegenüber werden die Gruppengesellschaften überwiegend in Mitgliedstaaten des Europäischen Wirtschaftsraums tätig, in denen die jeweilige Inlandswährung der EURO ist. Die Bilanzen der Gruppengesellschaften werden in Euro erstellt und veröffentlicht. Die Kalkulationen der Gruppengesellschaften erfolgen in Euro. Die Bewertungen des Betriebsvermögens der Gruppengesellschaften erfolgen ebenfalls in Euro. Umsatzerlöse der Gruppengesellschaften sind und werden überwiegend in Euro (sein). Im Ergebnis unterliegt die Emittentin sohin einem Währungsrisiko, falls der CHF (Schweizer Franken) gegenüber dem Euro aufwertet. Dementsprechend steigt in diesem Fall auch die Schuldenlast der Emittentin aus den Schuldverschreibungen, die in CHF (Schweizer Franken) denominiert sind.“

„Insofern jenes Kreditinstitut, bei dem ein Anleger ein Wertpapierdepot führt, unter Berücksichtigung und Einhaltung allfälliger Beratungs-, Informations- und Warnpflichten, einverstanden ist, die Zeichnung von Schuldverschreibungen direkt auszuführen, kann ein interessierte Anleger alternativ zu der oben beschriebenen Vorgehensweise dieses Kreditinstitut beauftragen, eine Kauforder für die Schuldverschreibungen bei der Zahlstelle zu platzieren. As statutory auditors, we have audited the financial statements (balance sheet, income statement and notes) of Sun Contracting AG for the year ended December 31, 2020.

These financial statements are the responsibility of the board of directors. Our responsibility is to express an opinion on these financial statements based on our audit. We confirm that we meet the legal requirements concerning professional qualification and independence.

Our audit was conducted in accordance with auditing standards promulgated by the Liechtenstein profession, which require that an audit be planned and performed to obtain reasonable assurance about whether the financial statements and the annual report are free from material misstatement. We have examined on a test basis evidence supporting the amounts and disclosures in the financial statements. We have also assessed the accounting principles used, significant estimates made and the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.
